

## jac electrostatic film

Avery Dennison - Australia

- A soft, supple, flexible PVC with high gloss for superior appearance.
- High tear resistance, excellent printability, conversion, and dimensional stability during use.
- The film clings securely to clean glass, enamel and polished surfaces by static electricity without the use of adhesives
- Can be repositioned and cleanly removed
- Good UV resistance, with up to 2 years outdoor durability (unprinted)

### Technical information

#### Physical Characteristics

Product	Adhesive	Release Liner	Face Sheet Thickness	Size
Electrostatic Film – Clear	Static Electricity	Kraft	155 micron	760 x 1000
Electrostatic Film - White	Static Electricity	Kraft	155 micron	760 x 1000

Calliper, facefilm		155 micron
Flammability		Self extinguishing
Shelf life	Stored at 22°C/50-55% RH	2 years
Durability*		Up to 2 years (unprinted)

\*based on Australian exposure conditions

#### Thermal

Application temperature Minimum: +5°C  
Temperature range <65°C

#### Print Carrier

Screen Printing

#### Adhesive

N/A

#### Release Liner

Kraft
