multicor

Corex - Australia

Established in 1985, Corex is now Australia's largest manufacturer of Hollow Profile and solid Polypropylene and HDPE sheet products.

Multicor is made from polypropylene and is highly resistant to water and organics environments. It is not attacked by aqueous solutions of inorganic salts, or by most strong mineral bases. Multicor retains resistance to temperature up to 60°C or higher.

Environment

Multicor can be recycled by Corex who have developed a repurchase program to help protect our environment.
